In an unprecedented, behind-the-scenes look at political decision-making in the most populated of Canada's provinces, this candid study of Ontario Premier Bill Davis and his Cabinet portrays the political process to be a daily round of committee meetings--a First Ministers' Conference, preparation of a throne speech, and the tabling of the provincial budget. The film reveals, to some extent, Davis's political philosophy, one that kept the Conservatives in power in Ontario for thirty-six consecutive years.

**Climate of Deserts**
2:16 min JISA 2010 2453

Most deserts cluster around the Tropics of Cancer and Capricorn. Others form on the west coasts of continents because of cold ocean currents. Temperature differences between night and day are extreme.

**Climate of Grasslands**
2:34 min JISA 2010 2453

Grassland plants grow and reproduce during the summer. Prairies often experience droughts; they can become dead zones. Storms and tornadoes can ravage the grasslands. Monsoons arrive yearly in the tropics.

**Climate of the Taiga**
1:54 min JISA 2010 2453

Temperatures in the taiga are can vary 180°. For most of the year, heat is deflected back into the atmosphere. The polar jet stream and the arctic water currents cool the region. Thick layers of snow insulate the soil.

**Deserts**
2:20 min JISA 2010 2453

Deserts are found in all temperature zones; the biggest are in the coldest zones. Highly specialized animals live in hot deserts. Lack of plants causes drastic temperature fluctuation. Climate change may reduce the size and number of deserts.
Cities have low biodiversity. Native and exotic animals live among plants. Weeds and small animals are farm nuisances. Only 15 species account for 96% of the Earth's agricultural products.

**Geography of Deserts**
2:10 min JISA 2010 2453
Deserts account for 30% of Earth's landmass. The Sahara is the largest subtropical desert. The Gobi is the largest continental desert. The Atacama is the largest west coast desert; it is also the driest. Polar deserts are extremely cold.

**Geography of Farms and Cities**

**Geography of Grasslands**
2:14 min JISA 2010 2453
Grasslands are temperate or tropical. Almost half of Africa is grassland. The prairies in North America differ from the desert. The steppes in Eurasia are the most extensive grasslands in the world. Tropical grasslands are savannas.

**Geography of the Tundra**
2:31 min JISA 2010 2453
Tundra biomes are treeless habitats that average a temperature of minus 20°F. The polar tundra is divided into the high and low arctic in the north and south pole regions; alpine tundra can grow in other regions.

**Geology of Farms and Cities**
2:02 min JISA 2010 2453
Geology influences the construction of cities; large underground rock beds can hold skyscrapers. Bedrock affects the drainage of soil for farms.

**Grasslands**
2:23 min JISA 2010 2453
Rainfall is scarce in the grasslands. Grass grows in tall stalks or hugs the ground. Grasslands exist all over the planet and are home to tough plants and animals. Impressive storms sweep the grasslands.

**History and Climate of the Tundra**
2:32 min JISA 2010 2453
Glaciers in the northern tundra are remnants of ice sheets. The tundra has long winters and short summers; it is too cold for trees. An isotherm divides tundra from taiga. Alpine tundra has a complicated climate.

**Life in Deserts**
2:01 min JISA 2010 2453
Plants and animals adapt to store water and maintain body temperatures in the desert. Cacti carefully store water and convert energy from the sun by closing their pores.

**Life in the Grasslands**
2:33 min JISA 2010 2453
Most grass species have one culm. The Big Bluestem is one of the most prominent prairie grasses. Some grasses have rhizome or stolon roots. Grasslands are full of insects, small mammals, and herbivores.

**Life in the Taiga**
2:34 min JISA 2010 2453
The taiga is mostly inhabited by birds and mammals; some reptiles make their home here. The insect population explodes when it gets warm. Fungi are critical to the biome's survival. Many places have broad leaf trees.

**Life in the Tundra**
2:15 min JISA 2010 2453
The organisms that thrive in the tundra are highly specialized. Polar bear, muskox, and caribou live in the tundra. Most plants are chamaephytes; they create micro-climates for small insects and worms.

**Temperate Forests**
2:25 min JISA 2010 2453
Temperate forests contain undiscovered life forms. Their moderate climate allows them to have four distinct seasons. Few virgin forests remain; two thirds of the US national parks are temperate forests.

**Boys, Toys and the Big Blue Marble**
NF056025,SV
52 min 2007 4997

Childhood seems more a nightmare than a playground: 180 million children work throughout the world; war has massacred 2 million, wounded 6 million and orphaned 1 million over the last five years; 100 million will never go to school and over half a billion live on less than a dollar a day. A child dies of poverty every three seconds. Girls certainly bear the brunt of most exploitation but often the boys are overlooked: they too suffer abuse. In societies where sexism, violence and discrimination are tolerated, what happens to these boys once they’re grown? Are the cruelty and injustice experienced by so many today the breeding grounds of tomorrow’s killers? In Boys, Toys and the Big Blue Marble abused and exploited youngsters all over the world speak about their lives and their amusements. They tell us of suffocating poverty as well as their hopes and dreams. This tough documentary told from the boys’ viewpoint is an appraisal of childhoods destroyed by slavery, criminality, war, sexual exploitation and human stupidity. Once they’ve grown up, what will these millions of broken boys do? Take revenge? Destroy the women and children in their lives? If the world is now preparing the next generation, what can one hope for in a profoundly unjust society? Yet while some swear to take revenge, others are trying to repair their lives and those of their families. The film examines themes such as slavery, war and criminality as experienced by boys in different countries, united by their games of marbles and soccer. Their childhood has been torn from them, but not their dreams.

PJIS 2014 1678
Students of all ages enjoy creative problem solving. Whether working alone or in groups, children and adults in classes, teams, and camps all become animated when tasked with creating, solving, or competing. Cubelets offer a great platform for presenting challenges and engaging students of many ages and levels of expertise to creatively attend to answering a range of challenges that include robotics, reasoning, and design.

Cubelets Six (KT06) is the perfect tool to explore robotics. Cubelets are a groundbreaking robot construction system designed for budding innovators ages four and up. Cubelets were designed to teach the big lessons behind complex systems, design thinking, and emergence with tiny robots.

The Cubelets KT01 standard kit comes with 20 magnetic blocks that can be snapped together to make an endless variety of robots with no programming and no wires. **When the Worst Happens: Extraordinary Stories of Survival** by Tanya Lloyd Kyi
People overcome impossible odds where others surrendered and failed. In extreme situations people can pull together, discover almost super-human skills, and survive.

What would you do if you were stranded or trapped in a situation where you had to fight for your life? When the Worst Happens is a collection of intense, true stories set in distant corners of the earth.

**At the Edge: Daring Acts in Desperate Times** by Larry Verstraete
Over twenty true-life stories about life-threatening situations and the wrenching choices made by the people facing them. In this compelling book, readers are presented with true accounts of desperate situations, and the split-second decisions that people were forced to make. Many of the stories focus on Canadian experiences, while the rest have emerged from around the world.

**Breaker Boys: How a Photograph Helped End Child Labor** by Michael Burgan
Little boys, some as young as 6, spent their long days, not
playing or studying, but sorting coal in dusty, loud, and dangerous conditions. Many of these breaker boys worked 10 hours a day, six days a week all for as little as 45 cents a day. Child labor was common in the United States in the 19th century. It took the compelling, heart breaking photographs of Lewis Hine and others to bring the harsh working conditions to light. Hine and his fellow Progressives wanted to end child labor. He knew photography would reveal the truth and teach and change the world. With his camera Hine showed people what life was like for immigrants, the poor, and the children working in mines, factories, and mills. In the words of an historian, the more than 7,000 photos Hine took of American children at work aroused public sentiment against child labor in a way that no printed page or public lecture could.

I Survived: Five Epic Disasters by Lauren Tarshis (True Stories)
Five harrowing true stories of survival, featuring real kids in the midst of epic disasters. From a group of students surviving the 9.0 earthquake that set off a historic tsunami in Japan, to a boy nearly frozen on the prairie in 1888, these unforgettable kids lived to tell tales of unimaginable destruction – and, against all odds, survival. Read their incredible stories: The Children’s Blizzard, 1888 The Titanic Disaster, 1912 The Great Boston Molasses Flood, 1919 The Japanese Tsunami, 2011 The Henryville Tornado, 2012

Paths to Peace: People Who Changed the World by Jane Breskin Zalben
With a stirring quote set within a stunning and incisive collage, Zalben sets the tone for each of the sixteen peacemakers she profiles in this book. Mahatma Gandhi, Eleanor Roosevelt, Cesar Chavez, and the Nobel Prize winner, Dr. Wangari Maathai, are some of the people she chose to represent different eras and parts of the globe. Many started down their path to peace during childhood, and all challenge us to think about improving the lives of others.

Sketches

Shattered
Fifteen-year-old Ian must complete community volunteer service to pass social studies. Choosing to work at "The Club" sounds like fun, until he arrives at what turns out to be a soup kitchen for the homeless. It is here that he meets Sarge, the pipe-wielding homeless man who saved Ian from a near-mugging. His real name is Jacques, and he was a soldier in the Canadian Armed Forces. His last tour of duty was as a peacekeeper stationed in Rwanda, an African nation Ian knows little about. What he learns will change Ian's view of the world-and may just help Jacques, too.

Stuffed
When Ian and his classmates watch a documentary about the health concerns of eating fast food, Ian decides to start a boycott and stop everyone he can from eating at Frankie's, a huge fast-food chain with a questionable menu. Can Ian stand up for what he believes in? Can you take on a corporate behemoth and win?

Alexandria of Africa
When Alexandria is arrested for shoplifting, having to drag herself into court to face a judge just seems like a major inconvenience. But Alexandria has been in trouble before-and this time she can't find a way to scheme out of the consequences. Before she knows it, she's on a plane headed to Kenya where she has been ordered to work for an international charity.

Branded
The principal announces that the school is implementing uniforms, and Ian finds himself caught in a conflict. While doing research for a social-justice class, he learns that the manufacturer of the uniforms is on the top-ten list for human-rights violations. When he tells the principal this, all he gets is a reminder that the penalty for refusing to wear the uniforms is suspension, and Ian finds himself caught in a whole new conflict—one with himself.

Tell Me Why (non-fiction)
Responding to the searching questions of a thoughtful thirteen-year-old, more than twenty-five influential, inspiring figures - including Lt.-Gen. Romeo Dallaire, Robert Munsch, Marc Garneau, Lynn Johnston, Rick Hansen, and many others - have shared their wisdom, their experiences, and their convictions about how to counter suffering, cruelty, and darkness. (32) In the beginning, women lived apart, unaware of the existence of men. Until one day, when the first woman, Toli, who was brave and adventurous traveled deep into the forest. Toli discovered solitary creatures with big muscles who knew how to climb trees and harvest wild honey. When Toli tasted their honey, she thought they should all live together. (3y) That is how one of the creation stories of the Aka people from the tropical rainforest of the Congo Basin goes. Akaya, Kengole, Dibota and their friends and family are hunters-gatherers (and also great story-tellers) who guide us through their world. They explain their origins, myths, and the very spiritual meaning of life. The film follows their unique community life as it unfolds over many years. We experience the practice of their spirituality in the most difficult situations. Their religion is playful and highly creative in dealing with deeply serious matters of life and death, and may be the oldest human religion practiced on earth today.

Le documentaire Grande fille! de la cinéaste Hélène Choquette lève le voile sur le phénomène de la puberté hâtive. Contrairement à il y a quelques décennies, il ne pas rare aujourd'hui de voir apparaître les premiers signes pubertaires chez des fillettes dès l'âge de 9 ans. En résulte un décalage inhabituel entre leur maturité physique et affective. Loin d'être une problématique marginale, la puberté hâtive est un voie de devenir une préoccupation de santé publique mondiale. Quelques suspects se trouvent déjà au banc des accusés : lobésité et lepoxion à des perturbateurs dans l'environnement seraient-elles à -blâmer ? Bien que les causes soient encore méconnues, les répercussions physiques, psychologiques et psychosociales chez les fillettes qui entrent prématurément en puberté sont bien visibles. Grande fille ! nous place devant la nécessité de s'adapter, en tant que société, afin de minimiser les effets de ce phénomène sur nos enfants.

Director Barry Greenwald takes his camera into a place
we never thought we'd see so intimately: a high-risk parole office and the people whose lives it touches—prisoners guilty of everything from murder to white-collar crime; officers desperate to keep their clients out of prison and their failures off the files. What you see on-screen is the real thing: raw, revealing and utterly fascinating. Over a 10-month period, we follow six high-risk offenders and the parole officers and therapists whose job is to make sure they stay clean, stay out of trouble and stay out of jail. The offenders put up with urine tests for drugs, random curfew checks and therapy sessions. Most work at it, some feel hopeless, others just go through the motions. Their stories are at turns bizarre, tragic, disturbing and endearing. Frightening and funny, sad and troubling, High Risk Offender is a stunning documentary.

Jigsaw Jill Series - Jill introduces the craft. Now don't get me wrong, I love animals... horses, tigers, frogs... my husband Jim. Just kidding a corse. But sometimes animals can be a pest too... so when I plant a crop of corn or something' and the crows come screeching in to eat all up... I need to scare em away. That's called a scare crow. Which is the inspiration behind today's craft sent in by Emma, 7 Chatham. You will need crayons, scissors, glue, paper, string, black marker and a hole punch. What to do: First take the paper and draw the body parts separately (2 arms, 2 legs, 1 shirt, 1 pair of shoes, 1 pair of pants, 1 head) and colour. Then you cut them out. Next glue it all together*** and after that with the black marker make a face. Finally, hole punch and tie a string. That is how you make a silly scarecrow puppet.

They say Jigsaw Jill I... now there is a gall who marches to the beat of her own drum . By Thurga, 10, Toronto To make a wacky drum you'll need 4 strong wooden blocks. Then glue gun them in to a square and then take clear duck tape and put it all around so when you poke it with your finger it does not break. For the stick you take a wooden cylinder and a clothes-making tape and rubber bands. So you take your stick and make a stick with the masking tape on the top then put the cloth on. Then where the masking tape is you put the rubber band so on then you get a wack sound when you hit your drum!

Windswept prairies, sloping coulees and stretches of open sky - this is the home of the Kainai Blood Indians, in the heart of southern Alberta. Filmmaker Loretta Sarah Todd takes viewers on a visually lush journey, exploring the significance of land, memory and knowledge in Kainai life. The catalyst for this expressionistic journey is the return of belongings of the Kainai, collected by Europeans during colonial times and kept in distant museums. As the community's elders examine the objects and share stories first-hand, they reveal how the rich threads of Kainai life thrive from one generation to the next. From their traditions and language to their sacred beliefs, this is a powerful continuum of culture that cannot be contained in a glass exhibit case. Stylistically blending sound, colour, light and words, this film explores the collective memory of the Kainai that resonates so deeply in their land and their storytelling traditions. Intertwining past, present and future, Kainayssini Imanistaisiwa: The People Go On is an eloquent testament to Kainai history, governance and existence.

Touchante introspection sur le thème du départ, ce film d’animation pose un regard poétique sur un jeune homme qui s’apprête à quitter la maison de sa mère, hésitant devant la commode ou le vieux coffre à jouets. Les objets font basculer le temps, lui rappellent son enfance, le départ de son père, son adolescence. La mère aussi se souvient, en observant par la porte entrebâillée de la chambre. Franchira-t-il le seuil pour aller à la rencontre de l’autre ? Un film d’animation conçu par petites touches. Un souffle, parfois, des pas qui hésitent avant le geste définitif. Quelques notes de piano. Un tremblement. L’émotion est là. Film sans paroles.

Little Big Girls
NF060554,SV
52 min 2014 1183
The documentary Little Big Girls by director Hélène Choquette sheds light on the phenomenon of early-onset puberty. Today, it isn't unusual to see the earliest signs of puberty in girls younger than the age of 9, though this was not the case a few decades ago. The result, inevitably, is a disconnect between the girls physical and emotional maturity. Far from being a marginal issue, early-onset puberty is fast becoming a worldwide public health concern. A number of causes are suspected: Could obesity and exposure to environmental contaminants, for instance, be to blame? While the causes may still be misunderstood, the physical, psychological and psychosocial repercussions on young girls going through this change so early are all too visible. Little Big Girls alerts us to the need to adapt, as a society, so as to minimize the impact of this phenomenon on our children.

Mediterranee Sempre - Mediterranean Forever
NF050243,SV
72 min 2000 1183
Leaving behind the shores they would never forget, Italians crossed the Atlantic in two waves of immigration: first, at the start of the 20th century, and then in the years following the Second World War. Ever since, the Mediterranean has lived on in the memories and dreams of the Italians who made Montreal their home. Starting from a village in Calabria, the director recounts their saga and presents a chapter from the history of his own community. Wherever the tides of immigration carried the Medici, the exiled descendants of Leonardo and Michelangelo have re-created a Mediterranean of the heart, to which they turn to reconnect with their roots. Through their words we witness the Italian spirit, marked by a history of families uprooted yet contributing so much to Quebec society. This is a film of lively historical and human interest, set against a backdrop of images depicting eternal Italy.

Mémoire ONF - André Melançon
NF060824,SV
6 min 2014 4742
Après avoir écumé les salles obscures de son Abitibi natale, suivant l'étoile de Fellini, il dérive doucement vers l'ONF à l'époque où tout peut arriver par accident. Le réalisateur Clément Perron lui propose un rôle dans Taureau (1973). Puis, on lui offre de réaliser un film pour enfants ; il n'y connaît rien. Son talent inné avec les enfants s'impose avec force n'est-il pas d'abord psycho-éducateur ! Méorable année 1978 : le documentaire Les vrais perdants fait grand bruit et les critiques proclament comme les six doigts de la main Meilleur long métrage québécois. La guerre des tuques consacre la renommée de Melançon dans le genre florissant des films pour enfants. Après plusieurs longs métrages, séries télévisuelles et mises en scène théatrales, le cinéaste revient aux sources avec l'émouvant documentaire Printemps fragiles (2005), mettant l'enfance au centre de ses préoccupations.

Marcel Carrière est sans doute au son ce que Michel Brault est à l'image. Entre 1958 et 1964, l'art et la technique vivent une vraie histoire d'amour. Les artisans transforment les outils du cinéma pour modifier à jamais notre regard sur la réalité. Avec son entêtement inventif, Carrière cherche à parfaire la prise de son synchrone, à délivrer son magnétophone des câbles et de la caméra. La liberté qu'a gagnée le preneur de son, c'est grâce à lui. Il est de presque tous les tournages marquants de cette folle aventure du direct à l'ONF, de l'an zéro avec le film Les raquetteurs (1958) à celui qui récolte les fruits de ces avancées techniques, le chef-d'œuvre Pour la suite du monde (1962). Carrière se lance dans la réalisation. Documentaires et fictions se succèdent, imprégnés d'un humour généreux, d’un ton bienveillant, à son image.

NFB Memories - André Melançon
NF061575.SV
8 min 2013 1183
Having fallen under the spell of Fellini in the movie theatres of his native Abitibi, André Melançon wandered into the NFB at a time when anything could happen. He nabbed a role in Clément Perron’s Taureau (1973), a gig that led to another offer—to direct children’s films. With no directing experience, he forged ahead, drawing upon his natural ease with kids and previous experience as a school counsellor. 1978 would be a banner year: Melançon’s documentary Les vrais perdans earned widespread praise and Comme les six doigts de la main was hailed as the year’s best Quebec feature film. La gruer des tuques (1984) consolidated his stature in the growing genre of children’s film. He went on to direct other features, along with TV series and theatrical productions, returning to the theme of childhood with the touching documentary Printemps fragiles (2005).

NFB Memories - Edouard Davidovici

NFB Memories - Marcel Carrière
NF061564.SV
7 min 2013 1183
Marcel Carrière is to sound what Michel Brault is to image. Between 1958 and 1964, art and technology were interacting in exciting new ways at the NFB, and young filmmakers like Carrière embraced the creative possibilities with energy and imagination, transforming the language of cinema. With a determined sense of invention, Carrière refined the art of sound recording, liberating soundmen from bulky and unwieldy technology. He collaborated on many of French Program’s early Direct Cinema films, beginning with Les raquetteurs (1958) through the masterful Pour la suite du monde (1963). He went on to direct his own films, working in both documentary and fiction, and infusing every project with characteristic humour and good will.

NFB Memories - Michel Brault
NF061562.SV
8 min 2013 1183
Back in 1947, while still making amateur movies with Claude Jutra, could Brault have known that he would mark film history? His defiant experimentalism shook things up at the NFB, and films like Les raquetteurs (1958) would launch an irreversible movement. Alongside US filmmakers such as Richard Leacock, the young Québécois was at the forefront of the Direct Cinema revolution—and his “walking camera” would influence Jean Rouch. He collaborated with Pierre Perrault and the inhabitants of Île-aux-Coudres on the landmark film Pour la suite du monde (1963), a key moment in vérité cinema. Restlessly creative, Brault continued investigating both reality and fiction. His own feature, Les ordres (1974), honoured at Cannes, remains ingrained in Quebec’s collective memory. Children’s cinema today looks to the legendary films like Mon Oncle Antoine and Les bons débarras. It is impossible to imagine Quebec cinema without him. Michel Brault died in 2013 at the age of 85.
One life, many chapters! Blais began his working life as a wartime artist in Europe. Returning to Canada in 1945, he was recruited to the NFB by Grierson himself. Blais would develop enormous respect for the famous Scot, and his last film, Monsieur John Grierson (1974), is dedicated to his memory. Among the few early francophone directors at the NFB, Blais defended his right to work in his own language. Named executive producer of Studio F, the so-called French Unit, in 1954, he argued for a fully fledged independent French-language program. Following a remarkably prolific career at the NFB, he moved on to an impressive set of new challenges leading a UN anthropology mission to New Guinea, running the audiovisual department for Expo 67, and more. He died in 2012 at the age of 95.

The term (3z(Bpioneer(3y(B has rarely been so appropriate: Roger Racine was the first francophone cinematographer at the NFB, the first French Canadian to direct photography on a feature film, and a member of the very first TV crew at Radio-Canada. Hired by John Grierson in 1942, Racine would assist cinematographer Boris Kaufman, a newly arrived refugee from occupied France. Noted for his masterful work on Jean Vigo's La Atalante (1934), Kaufman would influence Racine's early work on Le curé du village (1949) and La petite Aurore lentant martyre (1951). Feature films released during the ultra-conservative Duplessis years. Racine worked as a director at Radio-Canada from 1952 to 1964, and went on to found his own production company, Cinémétres, now run by his son Christian.

Bryophytes

Bryophytes occur as mosses, liverworts, and hornworts. These fungi have a symbiotic relationship with the plants. They reproduce using seed cones.

Fixing Carbon and the Carbon Exchange Rate

Two essential reactions in photosynthesis include carbon fixation and the carbon exchange rate. Detailed illustrations define and explain these concepts.

Flowering Plants: Angiosperms

These angiosperms are those plants whose seeds develop within a surrounding layer of plant tissue, called the carpel, with seeds attached around the margins. They reproduce through pollination.

Fungi/Mychorrhizae

Most plants rely on mychorrhizae, special relationships with certain fungi in the soil that help keep plants wet and transfer organic material from their soil to their roots. These fungi have a symbiotic relationship with the plants.

Leaves & Transpiration

Most leaves have two purposes: photosynthesis and water management. Transpiration is the process by which water evaporates from the leaves and pulls water and nutrients up into the leaves.

Life Cycles and Life History of Plants

Plants invest their energy in different ways to optimize survival and reproduction. Plants "choose" strategies that devote energy to rapid maturity and reproduction, or to persistence.

Non-Flowering Seed Plants: Gymnosperms

Gymnosperms are non-flowering seed plants that tolerate harsh climates such as the boreal forest. Examples include gingkoes, cycads, and conifers. They reproduce using seed cones.

Photoperiodism & Biological Clocks

Photoperiodism is a response to the duration timing of light and dark periods. Circadian, or biological, clocks have a 24-hour cycle and "wake up" the processes that make plants operate properly.

Photosynthesis

Plants synthesize food for themselves by using energy from the photons in sunlight. Oxygen is the byproduct of photosynthesis. Vocabulary includes mesophyll cells, chloroplasts, thylakoids, lumen, ATP, and more.

Plant Cells

A comprehensive look at plant cells includes concepts and vocabulary such as cell membrane, DNA, mitochondria, chloroplast, photosynthesis, vacuole, nucleus, endoplasmic reticulum, and more.
Plant Hormones
2:31 min JISA 2011 2453
Through hormones, plants can react to their environments. A hormone binds to its receptor on a specific target cell. Five plant hormones control different aspects of cell germination and growth.

Plant Nutrients
2:39 min JISA 2011 2453
Plants make their own sugars and nutrients from air, soil, and light. Macronutrients are required in large amounts. Micronutrients are needed in smaller amounts. Nutrients work together for maximum plant benefit.

Plant Reproduction
2:28 min JISA 2011 2453
Insects like bees and other pollinators carry male gametes to female gametes. They fuse to form a zygote that ultimately becomes a seed. Some plants, like bamboo, reproduce asexually.

Plant Roots
2:56 min JISA 2011 2453
Roots anchor plants in the soil; they absorb water and nutrients from the soil, which they then send to the plant; roots may also store food. Vocabulary includes gymnosperm, monocot, mucigel, cortex, vascular cylinder, and more.

Plant Seed Dispersal
2:20 min JISA 2011 2453
Abiotic plant dispersal uses wind power and physical characteristics that function like helicopters and parachutes. Germination occurs in the presence of water, temperature, and light.

Plant Stems
2:37 min JISA 2011 2453
Plant stems transport water and nutrients to leaves. They provide structural support, transportation between the root and leaves, and a location for food storage. They hold the leaves up toward the light to facilitate photosynthesis.

Plant Tissues
3:18 min JISA 2011 2453
The tissues of a plant are organized into three tissue systems: the vascular tissue system, the dermal tissue system, and the ground tissue system.

Polyploid Plants
2:40 min JISA 2011 2453
Polyploidy is the heritable condition of possessing more than two complete sets of chromosomes.

The Rhizosphere
2:31 min JISA 2011 2453
The rhizosphere is where plant roots live and grow. This includes water, air spaces, and other organisms. Soil particles are either organic or inorganic.

Seedless Vascular Plants
2:35 min JISA 2011 2453
Seedless vascular plants have a vascular structure of xylem and phloem that permits the transport of water and nutrients. Non-flowering vascular plants are divided into lycophytes and moniliphytes.

Seeds & Germination
2:50 min JISA 2011 2453
A plant embryo uses endosperm for food. This starchy or oily food also provides humans with food such as olive oil. Before germination, the seed must have water, oxygen, and a temperature between 69-77 degrees Fahrenheit.

Transport of Water and Nutrients
2:44 min JISA 2011 2453
Dermal root cells collect and store water. Water pressure forces it up into the plant, seeming to defy gravity. Xylem and phloem are critical to the water conduction system.

Tropisms & Photomorphogenesis
2:14 min JISA 2011 2453
A tropism is how a plant moves or grows in response to stimuli such as light, gravity, and movements towards water and certain chemicals. Responses vary. Photomorphogenesis describes how light influences a plant's development.

Entre 1936 et 1939, les Brigades internationales, constituées de 40 000 volontaires provenant de 27 pays, vinrent se battre en Espagne afin d’y arrêter la montée du fascisme. La crise économique de 1929 ainsi que la grande sécheresse dans l’Ouest canadien avaient créé un exode vers les villes où les ouvriers arrivaient par trains entiers. Le travail manquant. L’assurance chômage était inexistante et les soupes populaires ainsi que les camps de secours n’arrivaient pas à subvenir aux besoins. En Espagne, la guerre civile éclata. Le haut taux de chômage ainsi que la solidarité ressentie envers la cause ouvrière espagnole incitèrent certains Canadiens à s’engager dans le bataillon Mackenzie-Papineau. Seulement la moitié des 1 200 volontaires retournèrent au pays. Des vétérans nous racontent leur histoire.

The Girl in Red Story and pictures by Roberto Innocenti. Written by Aaron Frisch. This is a modern take on the centuries-old tale of an ailing grandmother, a wicked wolf, and a young girl in a red coat. Innocenti’s brilliantly detailed illustrations present a city as a wilderness, while text by Aaron Frisch narrates the journey of a girl named Sophia through the twists and turns of a stormy day.

Really Rapunzel Needed a Haircut! OF COURSE you think I was a horrible old witch, locking fair haired Rapunzel in that tall, tall tower. You don’t know the other side of the story. Well, let me tell you.

Whatever After: Fairest of All by Sarah Mlynowski. Mirror, mirror, on the basement wall...

Once upon a time my brother and I were normal kids. The next minute? The mirror in our basement slumped us up and magically transported us inside Snow White’s fairy tale. I know it sounds crazy, but it’s true.

Cinderella (as if you didn’t already know the story) by Barbara Ensor. You’ve heard the story a million times before. Mean stepmother. Lots of sweeping. Fancy ball. You remember. Or do you? Did you remember that Cinderella was such a nice girl—so smart and funny? You probably would’ve liked her. Did you know that “Cinderella” was just a nickname? And that her handsome prince loved Jell-o and was a wonderful dancer?

Cassie and the Wolf by Olivia Snowe. A hungry beast prowls the city streets, searching for Grandmother’s house. Caleb Woolf spots Cassie Cloak. She’s carrying a huge box of food . . . and he is very, very hungry.

The Twelve Dancing Princesses Retold by Mary Hoffman. The king has a problem. His twelve daughters wake up every morning with their slippers in rags and tatters. Where are they going? The palace is guarded to the hilt, and the shoemakers are exhausted. The king has promised his kingdom to anyone who can solve the mystery in three days and three nights.

The Snow Queen Retold by Sarah Lowes. An exquisitely illustrated retelling of the classic story by Hans Christian Anderson. An evil troll creates a mirror which reflects the bad and ugly sides of people. Shards of its glass enter a young boy, causing him to reject his loving family and best friend Gerda. Helped by kind strangers and guided by her warm heart, Gerda makes the perilous journey to rescue her friend from the icy palace of the Snow Queen.

Once Upon a Golden Apple by Jean Little. In this hilarious fractured fairy tale, everything seems to go wrong. Goldilocks lives with the seven dwarfs, a princess kisses a reluctant dragon, and she and her prince rescue the Wicked Witch of the West...until all mischief is sorted out and everyone lives happily ever after.

Fairy Tale Comics edited by Chris Duffy. Seventeen fairy tales are wonderfully adapted and illustrated in comics format by seventeen different cartoonists, including Raina Telgemeier, Brett Helquist, Cherise Harper, and more.

Puss in Boots retold by John Cech. When a poor miller dies, he has nothing to leave his son but a cat—but, fortunately, it’s a very smart cat. With just a pair of boots, a feathered hat, and a cloth bag, the wily Puss changes his master’s luck, transforming him from a peasant into a prince.

Rapunzel Paul O Zelinsky. Trapped in a tower with no door, Rapunzel is allowed to see no one but the sorceress who has imprisoned her—until the day a young prince hears her singing to the forest birds.

The Complete Grimm’s Fairy Tales This early works is a comprehensive and absorbing collection of some of the most popular fairytales ever written.

The Stinky Cheese Man and Other Fairly Stupid Tales by Jon Scieszka.
The entire book, with its unconventional page arrangement and eclectic, frenetic mix of text and pictures, is a spoof on the art of book design and the art of the fairy tale.

*Triptych* is a contemporary urban saga that tells the story of Michelle, a schizophrenic bookseller, her sister, Marie, a singer and actress, and Maries future husband, Thomas, a German neurosurgeon. Against a backdrop of written and visual poetry, the film depicts three pivotal moments in the lives of these characters while touching on an array of subject-artistic expression, social engagement versus solitude, the many nuances of emotion. In this study of human communication in all its forms and complexity, these three lives intersect in their quests for personal identity and a burning desire for self-expression. Directed by Robert Lepage and Pedro Pires, this film adaptation of Lepages epic, nine-hour play *Lipsynch* captures the essence of the original work, which deals with the human voice.
